Bobby – Springer with back rest

BOBBY
121 444
121 444OM

TECHNICAL INFORMATION

Assembly specifications: pre-assembled sections

Surface requirements: Impact surface materials according to EN 1177

Anchoring: Spring toys have a flexible base socket foundation that can be sunk below ground or anchored above.

Inspection /Maintenance: Every week/every season

Materials: Animals made of 15 or 18 mm thick HPL. Seat and back rest of EcoGrip.

Housing of hot-galvanised metal. The steel springs are primed and powder-coated.

HAGS Bobby – with support for the back

The secret behind HAGS well-loved springers is their perfectly designed ergonomic seats and the wonderful, gentle rocking motion created by the even distribution of the child's weight over the three points of contact – feet, bottom and hands. And now we have created a springer with yet another feature – a back rest. It is also very easy to access and exit with its open design.
