Bronco - A multi-mount ride

Bronco is one of colourful new features for the Spring from HAGS. The spring toy is for slightly larger children, between the ages of 5 and 12, and has a completely new play function. When the child sits on the rocker and leans, a surprising projectile motion occurs, almost like a rodeo. The child controls the level of difficulty when rocking themselves and the challenge increases the harder he or she plays. Bronco is also a splash of colour that brightens up the play area.

121 041 Bronco, sunken foundation
121 041 OM Bronco, above ground
